

Hi Linda (OSSTF D19 Going Green Committee Member):

On behalf of TRCA, we would like to take this opportunity to thank participants from OSSTF and their families for coming out to Heart Lake Conservation Area on Saturday May 26, 2018.

Your contribution to enhancing the Medicine Wheel Garden (Gitgaan Mashkiki) (MWG) and adjacent pollinator plots is most appreciated.

By planting native shrubs, the group has started the process of creating a path down to the recently established learning area near the MWG.

We have developed a fact sheet for you to share with the group which can be found on Etobicoke and Mimico Creeks Watershed website at the following link:

<https://trca.ca/conservation/watershed-management/etobicoke-mimico-creek/accomplishments/>

All fact sheets are listed by site in alphabetical order.

It has been a pleasure working with you both in the past and on this date and we look forward to continued partnerships.

Cheers, have a great weekend and all the best for the end of school year.

Casey Cook
